The Honorable Ed Herschler
Governor of Wyoming
State Capitol Building
Cheyenne, WY 82002

Dear Governor Herschler:

In compliance with the provisions of Chapter 39-1-303, Wyoming Statutes 1977, the Ad Valorem Tax Division of the Department of Revenue and Taxation submits its 1983 Annual Report. This report shows all taxable property in the State of Wyoming and the value of same in tabulated form.

Respectfully submitted

DEPARTMENT OF REVENUE AND TAXATION

A handwritten signature in cursive script that reads "Rudolph Anselmi".

Rudolph Anselmi, Chairman
STATE BOARD OF EQUALIZATION

ANNUAL REPORT
of the
STATE BOARD OF EQUALIZATION

AD VALOREM TAX DIVISION

Warren A. Bower, Director

Robert St. Clair, Assistant Director

AD VALOREM TAX DIVISION

Objective

The Ad Valorem Tax Division is the administrative arm of the State Board of Equalization. The primary duties of the Ad Valorem Tax Division of The Department of Revenue and Taxation can be directly traced to Article 15, Section 11 of the Wyoming Constitution, which reads in part: "All property....shall be uniformly assessed for taxation and the legislature shall prescribe such regulations as shall secure a just valuation for taxation of all property, real and personal." This provision and the many enabling statutes describe what the Division has as its objective.

The Board relies heavily on the county assessors and recognizes their importance in the administration of the Ad Valorem Tax Laws. The Board cooperates and assists the Assessors in any manner possible to ensure that all assessments are fair and equitable between property owners and between counties.

The Ad Valorem Tax Division is responsible for the accumulation of the necessary data for the Board of Equalization's use in determining the State General Fund and the State School Foundation Levy requirement.

Division personnel testify before the Board of Equalization during valuation appeals of both state or locally assessed property. The Division also investigates valuations, which will aid the Board in satisfying an appeal without the necessity of a formal hearing.

The Ad Valorem Division keeps the minutes of the proceedings, appeals and deliberations of the Board of Equalization in matters involving all types of taxation.

The majority of the assigned duties of the Ad Valorem Tax Division are found in the statutes relating to the State Board of Equalization, the Tax Commission and the Department of Revenue and Taxation. The statutes generally define three major categories of properties, "exempt", "state" assessed and "locally" assessed. Relative to the state assessed property, the Division gathers, compiles and analyzes information relating to the valuation of all mineral production, oil and gas production, pipelines, railroads, public and private utilities, telephone and telegraph companies and private railroad car companies. This information, along with the appraisal recommendations of the Division, are presented to the Board for its consideration in determining the fair assessed value of all state assessed properties. The Division then notifies all parties of interest. After the appeal time, these values are certified by the tax district to the county assessors to be included with locally assessed property as a basis for the levy of ad valorem taxes in various taxing districts within their respective counties. It should be noted that these state assessed properties now represent over 80% of the total State Ad Valorem Tax Base.

The Division, in cooperation with county assessors, prepares recommendations and guidelines for the uniform and equal assessment of locally assessed property. Division personnel inspect industrial complexes and plants throughout the state for the assessors. Applications for exemption of pollution control devices are also reviewed by this Division.

The Division compiles and maintains complete and current cumulative records of oil and gas production by counties; prepares and distributes annual reports relating to the taxable valuation of the state, by county and property classification; plans and conducts the annual assessor's school; meets with local assessors and other county officers on assessment matters; advises and confers with county assessors concerning the interpretation of the assessment and taxing statutes; aids the county assessors in the assessment of unusual properties in the various counties, and aids assessors with the instruction and supervision of local personnel hired to list the construction components of all buildings in the state for the revaluation program.

In addition to the direct constitutional and statutory duties, the Division also carries on many other activities - among these include the appearance of key personnel at public meetings to discuss the valuation and taxation process; meetings between Division personnel and individual and corporate taxpayers to discuss appraisal techniques used, equality and uniformity of local and state assessed values; conferences with other state tax officials to discuss mutual valuation problems. In line with the stated purpose of attaining uniform and equal valuations, the Division follows the policy established by the Board, by providing in-house training and cross training programs for our staff. Our training program also includes attendance at nationally recognized, professional appraisal schools by appraisal personnel as budgets permit. Our budget permitted 9 man weeks of professional training during FY-84.

The organization chart of this Division 18 full-time employees authorized, including a director, assistant director, supervisor of state assessments, supervisor of local assessments, two (2) senior appraisers, nine (9) staff appraisers, two (2) data coding technicians, and a secretary.

Because of the great amount of statistical information generated, many local, state and federal agencies look to this Division for information. State agencies we have supplied with information in the past year include the State Department of Education, the Department of Economic Planning and Development, the Department of Administration and Fiscal Control, Environmental Qualities, the Legislative Service Office, the State Planning Coordinator, other divisions in the Department of Revenue and Taxation and members of the Legislature.

In addition, we have had almost daily requests from non-government groups seeking data for feasibility studies on energy development, and environmental impact studies being conducted by private groups, governmental agencies, universities and industries.

Revaluation of Buildings and Town Lots

This Revaluation Program began in 1968 and is still incomplete in Big Horn, Carbon, Laramie, Natrona and Sweetwater Counties. However, these counties along with others were supplied a multiplier in 1975 to bring about the revaluation figure and was applied by these counties to be used until the Revaluation Program was finished. In effect they were revalued. The 1967 Wyoming Appraisal Manual will be phased out beginning in 1984. The replacement Appraisal Manual will provide assessors with up-to-date appraisal methods which should help eliminate problems which are becoming apparent in our existing system. The new Appraisal Manual will be computer assisted and capable of annual updates in compliance with the Department rule which provides for assessments to be made on a current value basis beginning in 1984.

Our staff will continue to aid County Assessors in carrying out their duties. A major concern of this Division and assessors is the lack of a Sales Price Disclosure law. Wyoming is one of the few states having no statutory requirement for recording of real estate selling prices. This makes the collection of market data very difficult and an expensive task. The enactment of legislation to this effect would be a tremendous help to assessors and to the Ad Valorem Tax Division in compiling market data that would enable the Division to apply statistical methods leading to more equitable assessments and as a tool for the Legislature to measure assessment performance.

Revaluation of Agricultural Land

Wyoming Statute 39-2-103 enacted by the legislature in 1973 requires all agricultural land to be valued for tax purposes based on its capacity to produce agricultural products. To comply with this legislation, an entirely new system of valuation needed to be put into effect. Soil classifications and productivity ratings of the Soil Conservation Service of the United States Department of Agriculture were determined to be the most commonly available data and were adopted as a basis for applying agricultural valuations. Since only 50% of the privately owned Wyoming agricultural land has been soil surveyed, this Division continues to urge legislative attention to a state supported program of soil surveys.

Meetings have been held in the past and will be held during 1983 with representatives from various agricultural organizations. The 1983 meetings will consider the Division's plan to update the agricultural land valuation base to a current year. Presently, agricultural land is based on production data from the year 1977 through 1982. Input from agricultural industry representative has been very useful in the past and the Division anticipates continued good relations in the future.

For the assessment year 1982, the 30% limitation on changes in agricultural land assessments initiated in 1977 was rescinded. In 1981, the Division sent letters to five counties indicating their continued unsatisfactory progress in equalization of this class of property would not be accepted in 1983.

The agricultural land revaluation program on the county level continues to require assistance and supervision of our staff. Except in one county, the Division's valuations of agricultural properties have been generally well accepted by the agricultural community. We assigned one full-time person to this project in 1983.

Valuation of All State Assessed Property

This program has as its objective the valuation of all property required by law to be assessed at the state level. The accomplishments of this program can be best shown by showing the types of property assessed, the number of companies and the total valuation for the past year.

<u>No. of Companies or Producers</u>	<u>Type of Company or Production</u>	<u>Assessed Value</u>
436	Oil	\$3,182,388,462
239	Natural Gas	1,132,051,442
23	Coal	1,113,645,140
8	Bentonite	9,613,166
89	Sand & Gravel	3,788,526
1	Taconite	11,466,018
5	Trona	121,583,686
14	Uranium	45,555,994
22	All Other Minerals	4,711,096
41	Pipelines	82,000,283
101	Public & Private Utilities	368,229,275
7	Railroads	103,358,223
17	Telephone & Telegraph	161,529,979
	TOTAL	<u>\$6,339,921,290</u>

It should be noted that in 1983, State assessed property represented approximately 79.9% of the total taxable valuation of the State.

The continuing yearly increase in the number of assessments and the valuation of State assessed property is a reflection of the industrial and mineral related growth which is occurring in Wyoming plus the growth in the number of taxing districts continues to increase the work load of the Ad Valorem staff.

All of the foregoing valuations are certified to the local assessors in whose county the property is located, or the minerals are produced.

There is a constant effort to update appraisal techniques used by the Division with regard to each type of property. We plan to continue these efforts as time and staff limitations permit to ensure that the properties are assessed as uniformly and as equitably as possible.

Assistance to Local Assessors

This program has as its objective a continuous program to assist all of the assessors in the many and varied problems of local assessments. Local assessments comprise approximately 20.1% of all of Wyoming's taxable valuations and amounted to \$1,596,636,385 in 1983. While these assessments are classified as local, the Ad Valorem Tax Division directly contributes a large portion of these values for the assessor. For instance, this Division has appraised the valuation of some 20,620 residential, rural and commercial buildings for the local assessors in FY-83.

The Ad Valorem Division also appraised 125 industrial plants and complexes which had a total taxable valuation of some \$201,572,099. The appraisal of these industrial properties requires frequent on-site inspection of the plants, with close attention to yearly changes and allowable exemptions for pollution control devices. While these properties are local assessments, the Division provides this service as part of our program of assisting the local assessors as well as providing for continuity and record keeping in the event of an assessor change.

The Division also provides recommendations and suggests guidelines to the assessors for most other types of property located within their county. Among the published guidelines and recommendations we provided to the assessors last year were the valuations for grazing land, dry farm lands, boats, tractors, construction equipment, bowling alley equipment, drilling rigs and equipment, aircraft, oil field equipment, commercial furniture and fixtures, livestock values (which are only subject to predatory and brand inspection taxes) and mobile and transportable home valuations.

In addition, we provide the assessors with information on the legal limits for mill levies and provide almost daily information, by telephone or letter, in answer to the many requests for information and assistance that we receive from the assessors.

The Division provides a frequent updating of information contained in an assessor's handbook which was compiled and furnished to the assessors by this Division. This includes such information as the interpretation of the statutes, opinions of the Attorney General relative to assessment and taxation, general information relative to the duties of the assessor and operation of the office and a multitude of other pertinent information. A new manual for appraising non-agricultural land and town lots was developed during 1983.

Problem Areas

The Division is now assessing directly 1,215 companies including private car companies plus 125 industrial facilities. These properties must be located and certified to assessors in one or more of the 313 individual taxing districts which include the 23 counties, 92 municipalities, 48 school districts, 54 fire districts, 36 cemetery districts, 14 recreation districts, 26 water and sewer districts, 11 hospital districts, 1 museum district, 4 solid waste districts, 2 water conservation districts, 7 improvement and service districts and 4 areas of separate bonding levies. (Mountain Bell has property subject to 238 individual taxing authorities.) Special districts were created by the legislature to authorize taxes in excess of constitutional limitations imposed on counties.

The appraisal of agricultural land for ad valorem tax assessments is progressing well in counties with completed or nearly completed soil surveys. In 1983, the Division was able to attract an appraiser with a soils background to its staff.

Inflation affects all property differently. Generally speaking, the value of any property is based on a buyer's opinion of the present worth of future benefits derived from ownership. Existing utility property values tend to be rather stable since regulatory agencies only permit them to earn on book value (historical cost). Unregulated property, such as housing, tend to increase in values as rentals increase, usually in proportion to replacement cost new. This difference presents two entirely different appraisal problems and two entirely different training programs for division personnel.

Legislation

The Forty-Seventh Legislature enacted the following laws affecting the Ad Valorem Tax Division:

AN ACT to amend W.S. 39-6-301(a) by creating a new paragraph (iii) and renumbering subsequent paragraphs and 39-6-302(a),(b),(c) and (e) relating to mineral severances taxes on coal; reducing the severance taxes on underground coal; providing a definition; and providing for an effective date of July 1, 1984.

AN ACT to amend W.S. 39-1-204(d) introductory paragraph and (h) relating to home owner's tax credit; providing for a decrease in valuation levels; providing for proration if insufficient funds are appropriate; and providing for an effective date of March 8, 1983.

AN ACT to amend W.S. 35-9-209 relating to city and town participation in a fire protection district; authorizing such participation; and providing for an effective date of May 17, 1983.

AN ACT to amend W.S. 39-2-402(b)(i)(M) relating to the 12 mill county levy; removing a limitation that not to exceed 3 mills from the levy may be expended for road and bridge purposes; and providing for an effective date of July 30, 1983.

W.S. 21-13-310 was amended to read: (c) Annually, commencing on July 30, 1984, the state board of equalization, when determinable, shall certify to the department of education whether or not the level of local assessments for any category in each county is in accord with the requirements of the board of equalization and, if not, the percent by which the assessments are below the board's requirements. If the assessment level of locally assessed properties for any category in any school district is more than five percent (5%) below the board's requirements, the department shall increase the amount of revenue to be included in the sum of local district resources under paragraphs (a)(i) and (ii) of this section by the amount of locally assessed value for any category necessary to comply with the board's requirements times the appropriate mill levies under paragraphs (a)(i) and (ii) of this section. This subsection does not apply if the board of equalization has complied with W.S. 39-1-304(a)(ii) and (iii), has ordered the valuations corrected and has certified the new valuations to the state department of education.

Litigation

Litigation relating to equalization of assessed values for certain electric utility property were concluded in FY-82.

These settlements resulted in downward adjustment for the years in question and the adoption of an equalization factor of 15% which more nearly equalized this class of property with other property for 1982 assessment and providing for equalization of all classes of property beginning in 1984.

Thunder Basin Coal Company (ARCO) withdrew their appeals from their 1981 coal assessment after a decision in District Court.

Other litigation and appeals pending are as follows:

1. Denial of Pollution Control Exemption for Uranium Tailings Ponds, Coal Storage Shed and Trona Storage Shed.
2. Denial of pollution control exemption for certain equipment that was not utilized on assessment date.
3. An appeal from a large ranch from its ad valorem tax assessment claiming a lack of equality.
4. The Burlington Railroad has filed a lawsuit in Federal Court seeking injunctive and declaratory relief over alleged discriminatory taxes.

Overview

The 1983 taxable value of \$7,936,557,675, which excludes motor vehicle and private railroad car values, decreased by \$175,583,171, due largely to lower production and lower unit value of oil (-\$427,000,000).

Coal output and price increases reflected a total value increase of \$124,000,000, and the value of natural gas production increased \$155,000,000, due entirely to a 16.5% increase in value per unit. The Division anticipates mineral production and values to remain under pressure during the remainder of 1983.

Except for county governments, taxable value changes have very little effect on tax rates due to legislative mandates, which require maximum local effort (high mill rates) in order to receive state grants or to achieve fund transfers for schools. Bond and interest tax levies, however, are independent of levy limitations.

City and town tax collections increased \$1,161,620 over the \$5,947,945 collected in 1982. About 50% of the increase was due to valuation increase and the balance due to levy increase.

County tax billings for 1983 increased \$18,784,380 due entirely to mill rate increases from 10.722 to 12.697 mills.

School taxes for 1983 remained essentially flat at \$401,729,274.

Total 1983 ad valorem taxes collectible are \$543,594,559.

Major contributors to the state's tax base are:

Mineral production	70.86%
Utility property	9.01%
Non-agricultural land and buildings	10.1%
Agricultural land and buildings	3.0%
Industrial property	2.5%
All other property	4.53%

Note: The valuations shown on page 18 for big Horn County and the state differ from those shown in the levy and tax section by \$16,965 as a result of a Board ordered increase which could not be precisely achieved at the local level.
